

Topic	Paper reference	Dataset (if needed)	Objectives					
Industrial Control Systems								
Attacks and detection 1	https://dl.acm.org/doi/pdf/10.1145/1966913.1966959		Implement attacks (sec. 5.4, 5.5., 5.6) on Tennessee Eastman plant					
Attacking Modbus	link		Implement a MODBUS simulator (using open source tools and simulators) and testing attack types in Table 4 of the reference paper					
Anomaly detection	Link		Implement the anomaly detector on one of the two datasets					
Internet of Things								
TOCTOU remote attestation	https://dl.acm.org/doi/pdf/10.1145/3460120.3484532		Implement the exchange needed by the attestation protocol on your machine					
SANA attestation	Link		Implement the exchange needed by the attestation protocol on your machine					
SIMPLE	Link		Implement the SIMPLE protocol					
Authentication	Link		Implement the authentication protocol					
Attack detection	Link	Simulator	Implement an IoT network, test, and detect attacks
